

The "Digital health" acceleration strategy

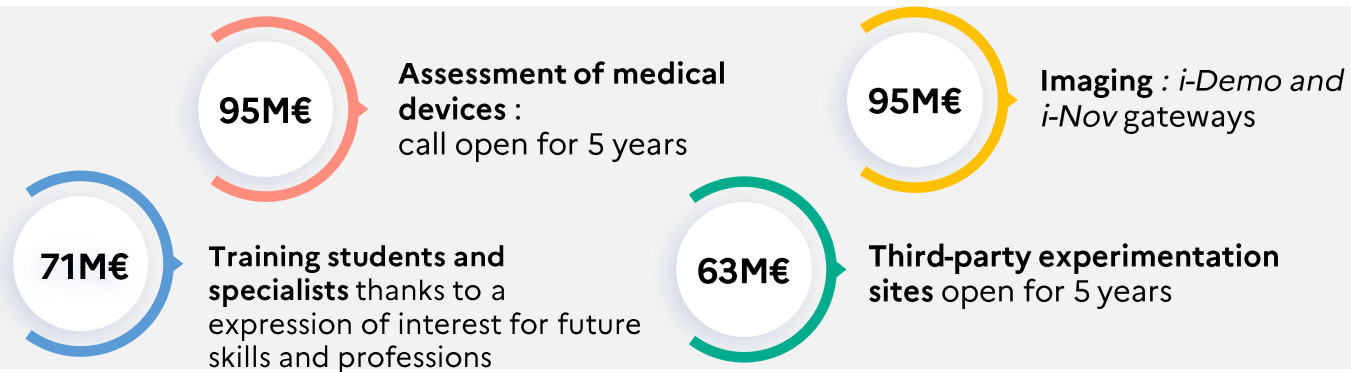

Make France a leader in digital health

A 670M€ national strategy to implement 5 areas to support innovation

Within the "France Innovation Health 2030" framework and in synergy with the digital health national plans (digital health roadmap, "Ségur numérique", ...), the French government has launched the "digital health" acceleration strategy with the aim of making France a global digital health leader.

Various actions launched through the strategy

Focus on international actions

G_NIUS international service

- Short-term - Creating info pages to help **understand digital health innovation processes and ecosystems in international markets**
- Mid-term - Setting up partnerships to ensure international visibility for **G_NIUS and actors of the French ecosystem and vice versa**

DM European taskforce

- Harmonization of evaluation criteria of digital medical devices within the EU
- **Common DM taxonomy**
 - **Common technical evaluation criteria**
 - **Common social health evaluation framework**

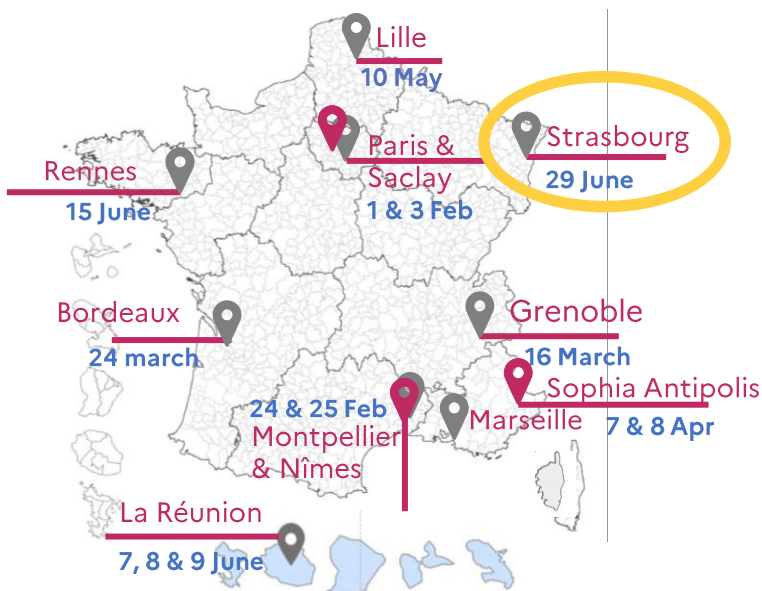

The "Tour de France" of the national Digital Health Acceleration Strategy
