

# Your roadmap to Mon Espace Santé with data exchange

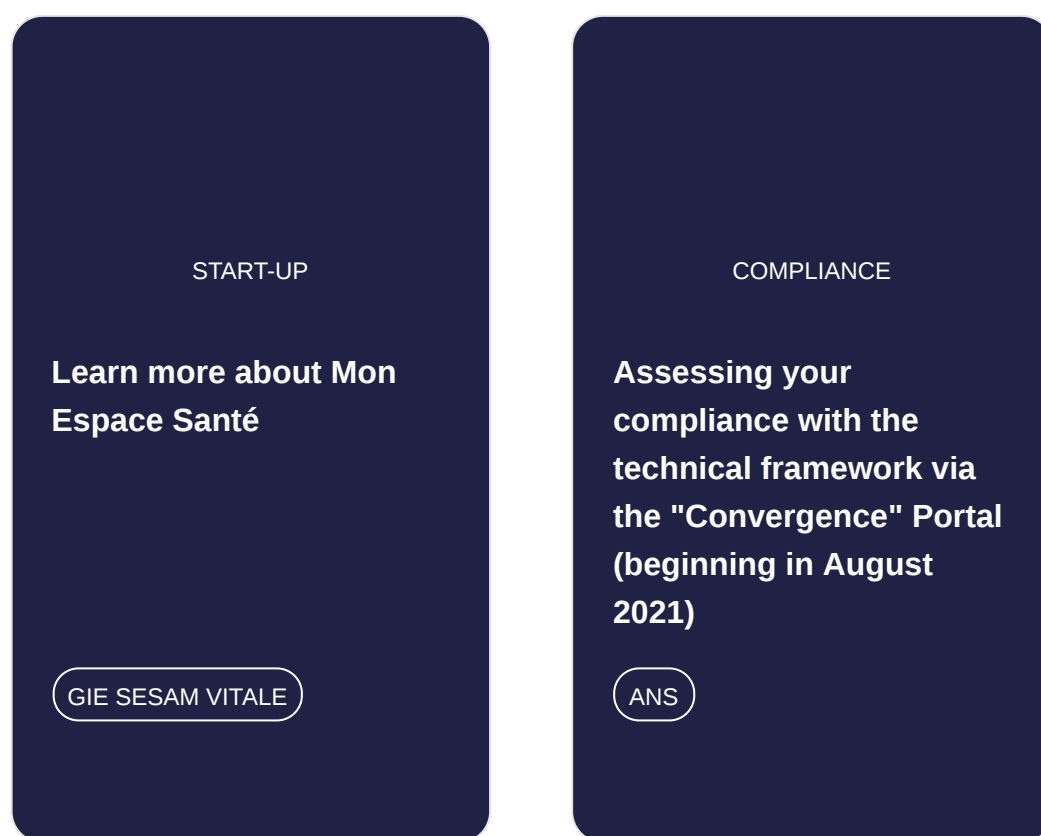

## If you would like your digital health solution to be listed in the Mon Espace Santé catalogue

The listing process and registration tools are currently being co-constructed and will be available starting in autumn 2021.

The roadmap will be updated as we build them.

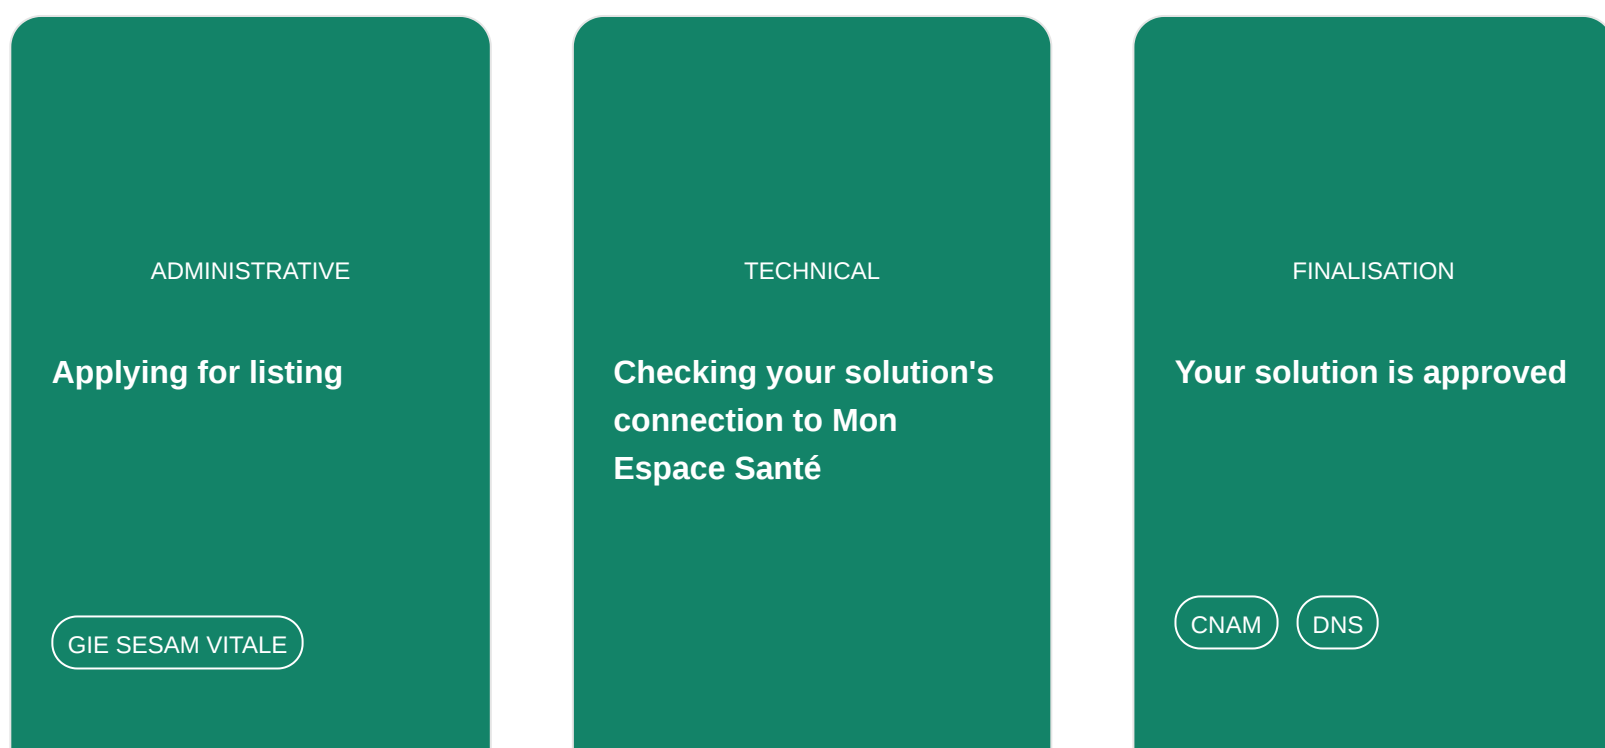

### Preparatory phase

Learn about all the actions that will need to be taken and the people to contact to prepare your listing process. Find tips and tricks to save time.

### Listing phase

Learn about all the steps involved in submitting your application to have your digital solution listed. The technical stage does not concern solutions without data and document exchanges with Mon espace santé

## Our tips for saving time

### Adopting the HL7® FHIR® standard

- HL7® FHIR® is the latest interoperability standard in the field of healthcare. It is a standard that is simple and fast to implement. It offers:
  - a catalogue of resources, objects representing actors or concepts from the domain. For example: the Patient resource represents a patient, Appointment represents an appointment, Observation a health measurement, etc.
  - And the methods of exchanging these resources based on the latest web technologies, in particular a REST API
- Start browsing the specification of the standard at <https://hl7.org/FHIR/>

### Adopting the interoperability framework

- The interoperability framework for health information systems, or CI-SIS, sets out the rules for medical IT applications with the ability to communicate. It consists of a set of functional and technical specifications, based on international standards, with the aim of facilitating communication and information sharing in the fields of health care and social care.
- Some components of the interoperability framework apply to the use of Mon Espace Santé resources, in particular the Shared Calendar Management component, the Mobile Health Records Sharing component, and the business-layer components which specify the structured format of health documents that can be included in the Shared Medical Record (DMP).
- Start browsing the interoperability framework components at <https://esante.gouv.fr/interoperabilite/ci-sis/espace-publication>

### Schedule

- The listing process and registration tools are currently being co-constructed and will be available starting in:
  - August 2021 for the "Convergence" tool
  - November 2021 for the "Publisher Portal"
  - January 2022 for the Catalogue of Listed Services
- The roadmap will be updated as we build them. If you wish to be informed of the latest developments, sign up for the G-NIUS community (link: <https://gni.us.esante.gouv.fr/inscription>)
- Beginning in autumn 2021, a "sandbox environment" of the Mon Espace Santé platform will be made available to test the compliance of the services and apply to have them listed. The "Convergence" and "Gazelle" tools

will be accessible via this platform.

- A platform for testing APIs and test sets to go with it will also be made available starting in autumn 2021.

### What the listing process is and isn't

- **It is a process** to ensure that candidate digital tools are aligned with technical requirements and sectoral best practices
- **But it is not a labelling or certification process**, nor an assessment of whether the candidate digital tools comply with all applicable regulations (e.g. GDPR), nor an assessment of medical usefulness

## Learn more about Mon Espace Santé

### 01. Getting the documentation from the GIE SESAM-Vitale's Espace Industriels site.

On GIE SESAM-Vitale's Espace Industriels site, you can get all the documentation on the work in progress on the Service Catalogue approval process. This work is being carried out with 30 entrepreneurs and manufacturers as part of a Call for Applications (CFA).

# Assessing your compliance with the technical framework via the "Convergence" Portal (beginning in August 2021)

## Prerequisites

- You must have downloaded and read the technical framework [Get the technical framework](#)

## Our advice

To learn more about Convergence, consult all the useful documentation:

- [Quick access to questions you may have about Convergence](#)
- [Read the FAQ on Convergence](#)

## 02. I log in to my Convergence account

COMPLIANCE **ANS**

### I do not yet have an account on the Convergence platform

- We invite you to download the registration form directly and, once completed, to send it to our team who will take care of your registration within 24 hours (average delay). Download the registration form [here](#).
- Once you have registered, you will receive an e-mail to confirm your registration and access the Convergence Portal.

Supporting documents to be provided: company's kbis / copy of a valid ID of the corporate officer.

### I already have an account on the Convergence platform

You have registered to the Convergence platform, you can connect directly by clicking on this [link](#).

### Need help ?

If you have any questions or difficulties regarding Convergence, please contact the SLA by e-mail : [ans-support-convergence@esante.gouv.fr](mailto:ans-support-convergence@esante.gouv.fr)

### 03. I assess the maturity level of my solution

#### I take the referral path to Mon espace santé in Convergence

- I fill in the information required in the Mon espace santé section of the Convergence platform either in the Referral without data exchange approach or in the Referral with data exchange approach.
- I fill in the information required in the Mon espace santé section of the Convergence platform either in the Referral without data exchange or in the Referral with data exchange section. In Convergence, information concerning the ethical criteria is expected. To fill in this information, you will need to use the [Ecoscore](#) tool. Please note: it is necessary to have a technical profile to use the Ecoscore.
- You must retrieve from the platform the Convergence product reference of the solution you wish to reference and the extraction of the results of the questionnaires filled in on the Convergence platform and send them to GIE SESAM-Vitale to officially enter the referencing process in the catalogue of services of Mon espace santé.

**I connect to Convergence**

## Applying for listing

### Prerequisites

- You've gotten the convergence ID for your solution and completed the convergence questionnaires

### Our advice

The listing application is filed in parallel with the connection tests (next step).

## 04. Your preliminary application is studied

ADMINISTRATIVE

GIE SESAM VITALE

### The eligibility of your digital service is evaluated

Complete the documents to enter the listing process:

- Fill out the **preliminary form** before filing the listing application. This form can be downloaded from the [listing portal](#)
- Send it to [referencement@mes.sesam-vitale.fr](mailto:referencement@mes.sesam-vitale.fr) with an extraction (in Excel format) of the results of the questionnaires filled out on the Convergence portal
- You're officially entered in the listing process for the Mon Espace Santé service catalog

### The GIE SESAM approves the eligibility of your application

If your application is eligible and compliant, GIE SESAM-Vitale will send you a **personalized listing package** as well as **the agreement to sign**

Your application is eligible if:

- Your digital solution complies with the eHealth technical framework at the levels expected by Mon Espace Santé.
- Your digital solution is relevant for listing. To find out if you're affected, see the page [Checking if your digital service is applicable](#) on the G\_NIUS site.
- This check is done on a declarative basis, with no evidence expected.

## 05. Submitting your file

### Fill out your listing file

Complete your file and send it to GIE SESAM-Vitale, with the signed agreement

### Need help?

If you have any questions, you can contact GIE SESAM-Vitale support at: [centre-de-service@sesam-vitale.fr](mailto:centre-de-service@sesam-vitale.fr)

## 06. Your file is reviewed

### Your listing file is evaluated

- The team of experts in charge of the evaluation analyses your listing file and the evidence of compliance.
- Respond to any requests (for additional information, or to deal with non-compliances).
- The evaluated service is studied in a listing commission during which an evaluation report of the candidate service is prepared, with one of the following "opinions": unfavorable, favorable with conditions attached, and unconditionally favorable.

# Checking your solution's connection to Mon Espace Santé

## Our advice

The connection tests are done in parallel with the listing application (previous step).

## 06. Running the connection tests

IMPLEMENTATION

GIE SESAM VITALE

### Running tests to connect to Mon Espace Santé

- Run the **technical tests** to connect to the APIs and submit an **acceptance file** to the testing team for the listing process:
  - If your file is satisfactory: You'll receive the terms and conditions for testing the connection to the Mon Espace Santé APIs in order to validate the integration of your solution.
  - If your file is unsatisfactory: Start over and/or perform additional tests
- For more information, you can consult the listing guide available at the [listing portal](#).

### Le condition pour un référencement avec échange de données

- Avoir un avis favorable de la commission de référencement, avec un échange de données autorisées pour certaines finalités. Le guichet de référencement reste unique via le parcours spécifique Mon espace santé mis en place sur la plateforme [Convergence](#);
- Réussir les tests de raccordement techniques, démontrant leur capacité d'utiliser les interfaces de programmation de manière conforme ;
- Obtenir le consentement du patient aux échanges de données dans Mon espace santé.

### Need help?

If you have any questions, you can contact GIE SESAM-Vitale support at: [centre-de-service@sesam-vitale.fr](mailto:centre-de-service@sesam-vitale.fr)

[Next](#)

# Your solution is approved

## 07. Approval from the commission

FINALISATION

GIE SESAM VITALE

### Getting approval from the independent commission

- You've fulfilled the **three conditions**:
  - The commission has given a **favorable opinion**
  - The Minister of Health has issued a listing decision
  - The **technical tests** for connection to APIs have been **passed**
- You get a listing notification, accompanied by the decision of the Minister of Health

## 08. Your service is published

FINALISATION

ASSURANCE MALADIE

DNS

GIE SESAM VITALE

### Listing of your service

- **Your service is listed** and appears in the catalog of services in Mon Espace Santé.
- Your service has earned the right to be listed for a period of **one year**, renewable upon its completion by filing a new application.

### Need help?
