

My roadmap My health space

I would like my solution to be listed in the Mon espace santé service catalog

The listing process and registration tools are available.

Preparatory phase

Find out what you need to do and who you need to contact to prepare for your SEO campaign. Find time-saving tips and tricks.

Referencing phase

Find out more about all the steps involved in applying for registration of your digital solution. The technical stage does not apply to solutions that do not exchange data and documents with Mon espace santé.

Our time-saving tips

Getting to grips with the HL7® FHIR® standard

- HL7® FHIR® is the latest interoperability standard for the healthcare field. It's a standard that's designed to be quick and easy to implement. It offers:
 - on the one hand, a catalog of resources, objects representing actors or concepts in the domain. For example: the Patient resource represents a patient, Appointment represents an appointment, Observation a health measure...
 - And on the other hand, methods for exchanging these resources based on the latest web technologies and in particular a REST API
- Start browsing the standard specification at <https://hl7.org/FHIR/>

Getting to grips with the interoperability framework

- The healthcare information systems interoperability framework, or CI-SIS, sets the rules for communicating medical informatics. It consists of a set of functional and technical specifications, based on international standards, with the aim of facilitating communication and information sharing in the healthcare and medicosocial fields.
- Some components of the interoperability framework apply in the use cases of feeding or consuming My Health Space resources, notably the Shared diary management component, the Sharing health documents in mobility component or the business layer components that specify the structured format of health documents that can be shared in the DMP.
- Start browsing the interoperability framework components at <https://esante.gouv.fr/interoperabilite/ci-sis/espace-publication>

What the SEO process is and isn't

- **This is a process** to ensure that candidate digital tools align with technical requirements and industry best practices
- **But it's not a process** of labeling or certification, nor an assessment of candidate digital tools' compliance with all applicable regulations (e.g. RGPD), nor the evaluation of medical relevance

Learn more about Mon espace santé

01. I get the documentation

On GIE SESAM-Vitale's Espace Industriels site, you can get all the documentation on the work in progress on the Service Catalogue approval process.

This work is being carried out with 30 entrepreneurs and manufacturers as part of a Call for Applications (CFA).

START-UP **GIE SESAM VITALE**

I download the documentation from the listing request portal

Find the complete guide to listing in the Mon espace santé service catalog and frequently asked questions from [the listing request portal](#) dedicated to publishers of digital healthcare solutions

Need help?

If you have any questions, please contact GIE SESAM-Vitale . Contact centre-de-service@sesam-vitale.fr

COMPLIANCE **ANS**

02. Connect to my Convergence account

I do not yet have an account on the Convergence platform

- We invite you to **create your account** on the [iSC Identity Provider](#) enabling you to access the Convergence platform thereafter.
- To sign up for a scheme, your structure's representative must be registered on the **Identity Provider** as its representative.

I already have an account on the Convergence platform

You have registered for the Convergence platform, you can connect directly by clicking on this [link](#).

Need help?

For any questions or difficulties encountered concerning Convergence, contact the ANS by e-mail: ans-support-convergence@esante.gouv.fr

[Previous](#)

[Next](#)

I submit my referencing request

Prerequisites

You must have downloaded and consulted the doctrine of digital health: [Access the doctrine](#)

Our advice

The referencing request is made at the same time as the hanging tests (next step).

03. My preliminary application is considered

ADMINISTRATIVE **GIE SESAM VITALE**

The eligibility of my digital service is assessed

I complete the administrative form available on the Convergence platform.

GIE SESAM-Vitale validates the admissibility of my request

If my application is admissible is compliant, GIE SESAM-Vitale then sends me **my personalized referencing file** as well as **the agreement to be signed**

My application is admissible if:

- My digital solution complies with the technical doctrine of digital health at the levels expected by Mon espace santé.
- My digital solution is concerned by referencing. To find out if you are concerned, check on the [I check if my digital service is concerned](#) of the G_NIUS website.

04. I submit my application

ADMINISTRATIVE

I fill in my referencing file

I complete [the referencing request form](#) and sign the agreement.
I officially enter the referencing process to the Mon espace santé service catalog.

Need help?

For all my questions, I can contact GIE SESAM-Vitale support at: centre-de-service@sesam-vitale.fr

[Previous](#)

[Next](#)

I assess compliance with the referencing criteria in the dedicated path on the Convergence platform

Prerequisites

- I have submitted my administrative file on the Convergence platform and my Agreement has been validated by GIE SESAM-VITAL

Our advice

Consult the exhaustive list of referencing criteria [here](#).

To learn more about Convergence, consult all the useful documentation:

- [Consult the FAQ on Convergence](#)
- [Consult the industrial user guide](#)

05. I assess the maturity level of my solution

COMPLIANCE **ANS**

I take the referencing path to My health space in Convergence

- I fill in the information expected in the Referencing My Guided approach.
- I complete the orientation questionnaire, which displays the criteria applicable to my solution.
- In Convergence, information and evidence concerning ethical criteria are expected. To fill them in, you'll need to use the [Ecoscore](#) tool. Please note: a technical profile is required to use [Ecoscore](#).
- Once you've completed your questionnaires, you'll need to generate an evaluation file number and apply.

[Connect to Convergence](#)

Need help?

For any questions relating to the journey in Convergence, contact the ANS by e-mail: ans-support-convergence@esante.gouv.fr

06. My file is studied

My referencing file is evaluated

- The team of experts in charge of the assessment analyzes my referencing file and proof of compliance.
- I respond to any requests (requests for additional information, handling of non-conformities).
- The assessed service is studied by the referencing commission, during which one of the following "opinions" is issued: favorable, favorable with non-suspensive reservations, favorable with suspensive reservations, unfavorable

[Previous](#)[Next](#)

Check that my solution is connected to Mon espace santé

Point of attention

This step only concerns the referencing of solutions with data exchange.

Our advice

Hanging tests are carried out in parallel with the referencing request (previous step).

07. I carry out hanging tests

IMPLEMENTATION

GIE SESAM VITALE

Mon espace santé connection tests

- I carry out the **technical tests** to connect to the APIs and send a **acceptance file** to the referencing process test team:
 - My file is satisfactory: I receive the terms and conditions for testing the connection to the Mon espace santé APIs in order to validate the integration of my solution.
 - My application is unsatisfactory: I start again and/or carry out additional tests
- For more information, you can consult [the referencing guide available here](#).
- The full specifications are available on editeurs.monespacesante.fr

The condition for referencing with data exchange

- Have a favorable opinion from the referencing commission, with data exchange authorized for certain purposes. The referencing window is the same via the My health space guided path on the [Convergence](#) platform;
- Pass technical connection tests, demonstrating their ability to use programming interfaces in a compliant manner;
- Get patient consent for data exchanges in My health space.

Need help?

For all my questions, I contact GIE SESAM-Vitale support at: centre-de-service@sesam-vitale.fr

Previous

Next

My solution is referenced

08. Opinion of the commission

FINALISATION **GIE SESAM VITALE**

Obtaining the opinion of the independent commission

- I meet the **conditions** :
 - The commission gives a **favorable opinion**
 - The minister in charge of health issues a referencing decision
 - The end-to-end technical tests and API connection are passed (if I follow a pathway with data exchange with Mon espace Santé)
- I receive notification of referencing, along with the decision of the minister in charge of health

09. My service is published

FINALISATION **ASSURANCE MALADIE** **DNS** **GIE SESAM VITALE**

Referencing my service

Publication in the Mon espace santé service catalog:

- My service is referenced and appears in the Mon espace santé service catalog.

Renewal:

- My service has been referenced for a period of one year, to be renewed at the end of the year with a new application.

Continuous assessment:

- Continuous assessment is used to check the conformity of the elements declared at the time of initial referencing. It is described in the ['arrêté du 20 novembre 2023](#).
- Or in the case of an alert formalized by a third party.
